CONVERSATIONAL QUIZ APP

BY CLAWDBOT

Problem

- Learning through traditional quiz apps is boring and text-heavy
- No voice interaction → less engaging and less accessible
- Students can’t get instant conversational feedback or hints
- Lack of adaptive question flow reduces personalized learning

Our solution

Conversational Quiz App

- AI-powered Conversational Quiz App
- Users can answer via voice or text
- Receive instant feedback, hints, and explanations
- Adaptive questions based on performance
- Gamified learning experience

Key Features

- 1. Voice & Text Interaction
- Answer quiz questions using voice chat or text, making learning interactive and engaging.
- 2. Real-Time Feedback
- The AI provides instant corrections, hints, and explanations for every answer.
- 3. Adaptive Question Flow
- Questions adjust difficulty based on user performance for a personalized learning experience.
- 4. Progress Tracking
- Track scores, improvements, and quiz history in real time.
- 5. Conversational Hints
- Users can ask the AI for clarifications or hints naturally during the quiz.
- 6. Offline Features
- Text extraction from offline documents
- PDF extraction for quizzes or study material
- Quiz creation without internet access, allowing learning anytime

What This App is About

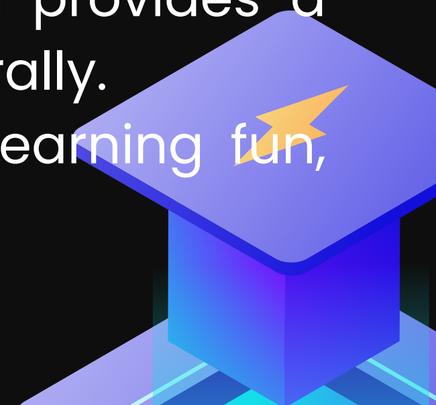
The Conversational Quiz App with Voice Chat is an AI-powered learning platform that makes quizzes interactive, engaging, and accessible. Users can answer questions through voice or text, receive instant feedback, hints, and explanations, and track their progress in real time.

Unlike traditional quiz apps, this app supports offline features, allowing users to:

- Extract text from documents
- Extract content from PDFs
- Create quizzes without an internet connection

The app also adapts question difficulty based on user performance and provides a conversational experience where users can ask for hints or clarifications naturally.

In short, it’s like having a smart, interactive tutor in your pocket, making learning fun, flexible, and accessible anywhere, anytime



Impact Slide

- Engaging learning experience through conversation
- Accessible via voice for all users
- Adaptive and personalized to each learner
- Encourages interactive, gamified education
